Our pressing device.**

World novelty Novopress 32

novopress

Always in dialogue

Skilled craftsmen and pressing equipment are one team. Good communication is a must. With the Novopress 32, this exchange is not a one-way street. The scratch-resistant display, which is suitable for use on construction sites, keeps you up to date on the status of the device at all times. Use the app to exchange useful information with your pressing device.

- **DISPLAY** – Press status, error messages, maintenance indicator, battery level & more
- **APP** – Locking & unlocking, individual settings (operating mode, light intensity), construction site report, press curves & more

Our plus in theft protection

Pressing devices are not safe - from theft and unauthorised use. At least until now. Because the Novopress 32 comes with a digital solution: a locking function using a key combination and our app. Nothing gets lost here.

- Locking the device using a key combination
- Locking & unlocking the device via app

- Customised configuration via app
- LED light ring with feedback

With 27 light-emitting diodes, the LED light ring provides a huge amount of luminosity. This ensures better visibility and greater safety at your job. The coloured ring also indicates whether the correct pressing force has been applied. The light intensity and duration can be set individually via the app.

- Pressing process active
- Press force build-up successful
- Press force build-up faulty

**Spot on and
press safely!**

Application-driven. Made for you.

We spoke to specialist installers around the world and visited construction sites on five continents. Always asking: What does the perfect pressing device look like? What should it be able to do? What problems should it solve? The result: the Novopress 32.

Highlights of the Novopress 32:

- **LED LIGHT RING**
for better lighting conditions & safe pressing
- **DIALOGUE ABILITY**
simple information exchange via display & app
- **NO NEED FOR SERVICE**
Constant pressing force of 32 kN thanks to innovative pressing force sensor
- **THEFT PROTECTION**
Locking & unlocking the device via app

If you would like to find out more about the story behind the Novopress 32, simply scan the QR code:

LED LIGHT RING
Spot on! More luminosity for reliable pressing.

DISPLAY

Always in dialogue: Intuitive display for a transparent device status.

RECHARGEABLE BATTERY

Powerful lithium-ion battery by Milwaukee

180° ROTATABLE HEAD

When things get tight – flexible handling at every pressing spot.

THEFT PROTECTION
Nothing gets lost: theft protection on the device & via app.

NO SERVICE NEEDED

Why put an eye on regular service? Thanks to the innovative pressure sensor, you can do without.

SECOND START BUTTON

If the first start button is difficult to reach in tight installation situations.

Regular service intervals? No thanks!

A pressing machine that doesn't need to be serviced every two years - sounds too good to be true? The press force sensor on the Novopress 32 makes it possible. It ensures that the pressing force remains constant and wear is minimised. And if a service does become necessary, the Novopress 32 will reliably let you know.
